Time Remaining: 00:08:34

▲ Hide Time Remaining ▲

Part 1 of 3 - MULTIPLE CHOICE

Question 1 of 50 0.2 Points

..... are often used to hold meetings when the participants are in different physical locations.

- ☐ A. Forums
- ☐ B. Videoconferences
- ☐ C. Teleconferences
- ☒ D. B and C are correct.

[Reset Selection](#)

Question 2 of 50 0.2 Points

What is the storage device that holds its data on spinning magnetised disks?

- ☐ A. Central Processing Unit
- ☐ B. Monitor
- ☐ C. Optical drive
- ☒ D. A hard disk drive

[Reset Selection](#)

Question 3 of 50 0.2 Points

..... performs a similar function as a hard disk drive but without moving parts.

- ☐ A. Central Processing Unit (CPU)
- ☐ B. Solid state drive (SSD)
- ☐ C. Optical disk drive
- ☐ D. An external disk drive

[Reset Selection](#)

Question 4 of 50 0.2 Points

What is the small part inside smartphones and other devices that measures change of speed, e.g. if someone drops it?

- ☐ A. Alphanumeric
- ☐ B. Universal Serial Bus
- ☒ C. Accelerometer
- ☐ D. Mp3 Player

[Reset Selection](#)

Question 5 of 50 0.2 Points

What is the box inside a computer and converts mains electricity into the appropriate voltages for the internal components?

- ☐ A. Solid state drive (SSD)
- ☐ B. A hard disk drive (HDD)
- ☒ C. The power supply unit (PSU)
- ☐ D. Optical disk drive

[Reset Selection](#)

Question 6 of 50

0.2 Points

..... is the code that is supplied with an OS or software when purchased and which is entered the first time it is run to verify that it was obtained legally.

- ☐ A. product key
- ☐ B. password
- ☒ C. serial number
- ☐ D. A and C are correct.

[Reset Selection](#)

Question 7 of 50

0.2 Points

Which word below means changing something to make it suit a special purpose?

- ☐ A. Update
- ☐ B. Reboot
- ☐ C. Tag
- ☒ D. Customize

[Reset Selection](#)

Question 8 of 50

0.2 Points

The smallest unit of memory used to store a single character is

- ☐ A. A megabit
- ☐ B. A kilobit
- ☒ C. A byte
- ☐ D. A gigabit

[Reset Selection](#)

Question 9 of 50

0.2 Points

What is the 'brain' of the computer and carries out the instructions that the software gives it?

- ☒ A. Central Processing Unit (CPU)
- ☐ B. Solid state drive (SSD)
- ☐ C. Optical disk drive
- ☐ D. A hard disk drive (HDD)

[Reset Selection](#)

Question 10 of 50

0.2 Points

..... establish short-range ('local') connections, perhaps covering a single office or company within a building, whereas cover much larger areas.

- ☐ A. LANs - VPNs
- ☐ B. WANs - LANs
- ☒ C. LANs - WANs
- ☐ D. VPNs - WANs

[Reset Selection](#)

Question 11 of 50

0.2 Points

Who writes, tests and debugs computer programs, usually as part of a team?

- ☐ A. Database administrator
- ☒ B. Software developer
- ☐ C. Helpdesk supervisor
- ☐ D. Support technician

[Reset Selection](#)

Question 12 of 50

0.2 Points

..... are glasses with monitors on the inside which are connected to a computer, enabling the user to see a three-dimensional image.

- ☒ A. Virtual reality goggles
- ☐ B. SATA socket
- ☐ C. An operating system
- ☐ D. Dialogue box

[Reset Selection](#)

Question 13 of 50

0.2 Points

..... means 'comprised only of letters and numbers and not including spaces or punctuation symbols'.

- ☒ A. Alphanumeric
- ☐ B. Character
- ☐ C. Password
- ☐ D. Security

[Reset Selection](#)

Question 14 of 50

0.2 Points

..... is the software that controls a computer. Its functions are wide-ranging and include managing the GUI, memory, storage and other hardware.

- ☒ A. A programming software
- ☐ B. SATA socket
- ☐ C. An operating system
- ☐ D. An application software

[Reset Selection](#)

Question 15 of 50

0.2 Points

When a hard drive is....., it is divided up into two or more sections which each act like a separate drive.

- ☐ A. removed
- ☒ B. partitioned
- ☐ C. installed
- ☐ D. set up

[Reset Selection](#)

Question 16 of 50

0.2 Points

..... uses laser light to store or get information (for example, on CDs).

- ☐ A. The hard disk drive

☒ B. An optical disk drive

☐ C. The main memory

☐ D. Expansion cards

[Reset Selection](#)

Question 17 of 50

0.2 Points

What is a secret word that you type into a computer before you can use it?

☐ A. Data

☒ B. Password

☐ C. Character

☐ D. Alphanumeric

[Reset Selection](#)

Question 18 of 50

0.2 Points

..... displays the information on the computer.

☐ A. A CPU

☐ B. A case

☐ C. A motherboard

☒ D. A screen

[Reset Selection](#)

Question 19 of 50

0.2 Points

What is the circuit board that carries a separate processor and is similar to the CPU but designed specifically to process imagery, mostly video?

☐ A. External hard drive

☒ B. Graphics card

☐ C. Hard disk drive

☐ D. Monitor

[Reset Selection](#)

Question 20 of 50

0.2 Points

If we tell someone to reboot a computer, it means to it.

☒ A. restart

☐ B. turn off

☐ C. turn on

☐ D. None is correct.

[Reset Selection](#)

Question 21 of 50

0.2 Points

..... supervises technical support staff, who may be working in a telephone call centre.

☐ A. Database administrator

☐ B. Software developer

☒ C. Helpdesk supervisor

☐ D. Systems analyst

[Reset Selection](#)

Question 22 of 50

0.2 Points

A small circuit board with a number of memory chips on it is called.....

- ☒ A. Dual In-line Memory Module (DIMM)
- ☐ B. Central Processing Unit (CPU)
- ☐ C. Hard disk drive (HDD)
- ☐ D. Solid state drive (SSD)

[Reset Selection](#)

Question 23 of 50

0.2 Points

The terms and conditions that you agree to when you purchase software or sign up to a website are called.....

- ☐ A. User accounts
- ☐ B. Serial numbers
- ☒ C. Licence terms
- ☐ D. Passwords

[Reset Selection](#)

Question 24 of 50

0.2 Points

..... has only letters and numbers.

- ☒ A. Alphanumeric
- ☐ B. Character
- ☐ C. Password
- ☐ D. Security

[Reset Selection](#)

Question 25 of 50

0.2 Points

What is the basic software built into PCs that initialises the computer and controls it before the OS starts?

- ☐ A. An operating system
- ☐ B. An application software
- ☐ C. A Global Positioning System
- ☒ D. Basic Input Output System

[Reset Selection](#)

Question 26 of 50

0.2 Points

Networks that use radio signals are known as networks, while networks using cables are

- ☐ A. wired - wireless
- ☒ B. wireless - wired
- ☐ C. wireless - wifi
- ☐ D. wifi - wireless

[Reset Selection](#)

Question 27 of 50

0.2 Points

..... is the information such as numbers and detail about people.

- ☒ A. Data
- ☐ B. Password
- ☐ C. Character

☐ D. Alphanumeric

[Reset Selection](#)

Question 28 of 50

0.2 Points

The window that provides information as well as asking for input from the user is called

- ☐ A. SATA socket
- ☐ B. Virtual reality goggles
- ☐ C. An operating system
- ☒ D. Dialogue box

[Reset Selection](#)

Question 29 of 50

0.2 Points

A small box which plugs into a USB or similar socket and can be used to send and receive data over the mobile phone network instead is called.....

- ☒ A. A dongle
- ☐ B. A network
- ☐ C. An external hard drive
- ☐ D. A mp3 player

[Reset Selection](#)

Question 30 of 50

0.2 Points

Who controls meetings and is useful for running the meeting smoothly and keeping it focused?

- ☐ A. Partner
- ☐ B. Colleague
- ☒ C. Chairperson
- ☐ D. None is correct.
